Diversified Refrigeration is a leading provider of Commercial Refrigeration and HVAC services throughout Southeastern Pennsylvania. For more than 30 years, the company has provided solutions for HVAC, Refrigeration, boilers, indoor air quality, and energy efficiency challenges to industrial and commercial companies throughout southeastern Pennsylvania and the region. Centrally located in the heart of Bucks County, the company offers a Preventative Maintenance program that keeps its commercial client's HVAC/R systems running at peak performance, saving downtime and money. After more than 32 years of hard work, the founders of Diversified Refrigeration, Gary and Cheryl Derr, sold the business in December 2020 to enjoy a well-earned retirement. The new owner, Sprague Cook, is a former naval officer and a graduate of the U.S. Naval Academy with more than 25 years of engineering and construction experience, including eight years involved in the project management, engineering, procurement, installation, and startup of industrial Refrigeration and central cooling system projects.
