VERSA-LOK® Retaining Wall Systems, in Oakdale, MN, has been creating Solid Solutions™ for architects, engineers, contractors, and homeowners since 1987. The company pioneered the solid, pinned segmental retaining wall (SRW) system and held numerous patents for the top-down, hole-to-slot pinning system. Imitated but never duplicated. VERSA-LOK Retaining Wall Systems pioneered the solid, pinned segmental retaining wall (SRW) system and held numerous patents for the top-down, hole-to-slot pinning system. Well-known among landscape architects, specifiers, contractors, and homeowners for ease of installation and design flexibility. VERSA-LOK Retaining Wall Systems pioneered the solid, pinned segmental retaining wall (SRW) system and held numerous patents for the top-down, hole-to-slot pinning system. The Standard unit is the backbone of VERSA-LOK retaining wall systems. It has the heft required for the most demanding landscaping projects, yet it is still easily installed. Curves, corners, columns, stairs and freestanding walls are all possible using the Standard unit alone.
