Liquid Stone Concrete, located in Burleson, Texas, is a local concrete plant producing quality concrete for many projects in the Burleson, South Ft. Worth Area since 1997. The company's batching facilities are rated and can produce more than 175 yards/ hour depending on the mix design, placement type, distance of job from the plant, and traffic conditions. Liquid Stone Concrete plants are state of the art with computerized mixes to fit your specific requirements. One of the benefits of working with Liquid Stone Concrete is being able to talk to the people you need to complete your project. Feel free to contact us if you have any questions.
