AMSYSCO, Inc. is a Post-Tensioning Institute Certified Plant, post-tensioning supplier, engineering, and manufacturer of post-tensioning systems headquartered in Romeoville, Illinois. Since 1981, the company has provided unbonded post-tensioning to construction contractors and structural engineers. The entire procurement, manufacturing, and testing processes of AMSYSCOs distinctive GREEN PT System are produced under the Post-Tensioning Institutes' rigorous plant certification program for Unbonded Tendons. AMSYSCO provides cost-effective post-tensioning solutions across many structures and applications such as condominiums and apartments, office buildings, parking garages, hospitals, schools, slab-onground, storage tanks, stadiums, repair and restoration, barrier cable, unique structures, and applications. The company works with suppliers who deliver the best quality, value, and service at the most competitive cost.
