Southeast Environmental is a full-service environmental firm specializing in asbestos, indoor air quality investigations, and lead-based paint testing and abatement. Its highly trained team of abatement contractors is experienced in the latest environmental service techniques to ensure your home or commercial building remains free and clear of asbestos and other potentially harmful substances. Located in Ooltewah, TN, Southeast Environmental offers asbestos removal, mold remediation and testing, and selective demolition services. The firm has the licensing, accreditation, and certifications to offer all services mentioned above. Southeast Environmental services are available in middle Tennessee, Southeast Tennessee, Northeast Alabama, and North Georgia. Its services, reviews, and awards are listed on the company's website, along with a blog and informational articles.
