Arista Pool & Spa, Inc. is a swimming pool construction contractor based in Collegeville, Pennsylvania. Arista specializes in the construction of inground swimming pools and spas made of concrete, also referred to as Gunitite. From start to finish, an entire project will take anywhere from 6 to 8 weeks, weather permitting. Keep in mind that adding stonework to your project will bring you closer to the 8-week timeframe as our stonework is done by a professional mason who chips and forms all the stones by hand. The company's website offers promotional videos, photographs of inground pools built by Arista, and general information about available options in pool construction, tile selection, purification alternatives, water features, interior pool finish, and types of inground pools. A published pool guide is available on request.
